1. Permits, Change, Transfer, Renewal, Sale

The permittee was removing snow which contained some non-coal waste material from the Deer Creek Mine disturbed area and deposited the material outside the permit area. The snow and non-coal waste was deposited at the Huntington Power Plant's ash pile. A Notice of Violation (04-39-3-1) was written for conducting mining activities outside the permit area. The MRP states that snow can be placed at the waste rock site of the Deer Creek Mine. The abatement is: the permittee will remove the non-coal waste material from the snow piles at the Huntington Power Plant's ash pile. The snow will report to a total containment impoundment at the ash pile.

4.a Hydrologic Balance: Diversions

The diversions were functioning as designed. Water was flowing within the diversions and drop drains.

4.c Hydrologic Balance: Other Sediment Control Measures

Several dugout ponds were inspected and functioning as designed.

7. Coal Mine Waste, Refuse Piles, Impoundments

The waste rock site was inspected with no hazardous conditions noticed during the inspection.

8. Noncoal Waste

The mine site area was clear of non-coal waste material. The permittee has added plastic mesh above and in front of the containment area to reduce the possibility of the material leaving the containment. The plastic mesh in front of the containment area was not being used.
